

utthesis — University of Texas at Austin Thesis*

Henry Schreiner[†]

Released 2016/05/02

Abstract

This is a class for building a UT thesis. It uses standard latex install procedures for a single dtx file. Running luatex on the dtx file will produce all needed files. Running luatex on the dtx file will only produce necessary files (not documentation).

1 Introduction

This is the U.T. Austin Doctoral Dissertation Format.

First, set your graduation year with `\UTyear=Your year`. If you are not going for a Ph.D., you will need to set `\renewcommand{\UTdegree}{Your Degree}` and `\renewcommand{\UTlongdegree}{Full Degree}`.

Then, after starting your document normally, and setting author, etc., use `\UTCopyrightlegend` to make a copyright page. Be sure to put `\frontmatter` before you start making pages, to ensure the pdf page numbers are not duplicated (two page 1's instead of page 1 and page i).

Then, use the `UTCommittee` environment and `\UTaddsupervisor{}`, `\UTaddcosupervisor{}`, and `\UTaddcommittee{}` to add your committee members.

Then, use `\UTtitlepage{Current Degree}{Month}` to make a title page. A dedication can be added with `\UTdedication{}`. All of these commands will correctly suppress but count page numbers.

You should use the `\begin{UTabstract}{supervisor}` environment to create an abstract page with required details. You can add a star to include a publication number blank.

2 Usage

2.1 Defines

<code>\UTdegree</code>	Redefine <code>\UTdegree</code> to set a new degree. Defaults to Ph.D.
<code>\UTlongdegree</code>	Redefine <code>\UTlongdegree</code> to set a new long degree description. Defaults to Doctor of Philosophy.
<code>\UTyear</code>	This is a counter that holds the current year. Use <code>\UTyear=1234</code> to set the year to a different year.

*This file describes version v1.1, last revised 2016/05/02.

[†]E-mail: henryiii@physics.utexas.edu

2.2 Commands

<code>\UTcopyrightlegend</code>	Prints out a copyright legend page. Uses <code>\author</code> and <code>\UTyear</code>
<code>\UTaddsupervisor</code>	Adds a supervisor.
<code>\UTaddcosupervisor</code>	Adds a cosupervisor (optional)
<code>\UTaddcommittee</code>	Adds a committee member $\{\langle member \rangle\}$.
<code>\UTtitlepage</code>	Adds a title page, using <code>\author</code> , <code>\title</code> , etc. You will need to use your current degree for $\{\langle olddegree \rangle\}$, and your expected graduation month for $\{\langle month \rangle\}$.
<code>\UTdedication</code>	Adds a dedication page, with correct centering.

2.3 Environments

<code>UTabstract (env.)</code>	This environment is for your abstract. You can pass in an ‘s’ optionally through $[\langle s \rangle]$ to add multiple advisors. The manitory argument $\{\langle advisor \rangle\}$ holds the advisor(s) names.
<code>UTcommittee (env.)</code>	This environment holds <code>\UTaddcommittee</code> names.

3 Implementation

```

1 \RequirePackage{xparse}
2 \RequirePackage{amsmath}
3 \RequirePackage{etoolbox}
4 \RequirePackage{setspace}
5
6 \setlrmarginsandblock{1.25in}{1.25in}{*} % spine, edge
7 \setulmarginsandblock{1.25in}{1.5in}{*} % {hupperi}{hloweri}{hratioi}
8 \setheadfoot{.5in}{.5in} % Headheight, footskip
9 \setheaderspaces{*}{.25in}{*} % headdrop, headsep, ratio
10
11 \checkandfixthelayout
12 \typeoutlayout
13
14 % No headers
15 \pagestyle{plain}
16
17 % Nice "double" spacing (1.5, as allowed)
18 \newcommand\UTSpacing{\OnehalfSpacing}
19 \DeclareOption{double}{\renewcommand\UTSpacing{\DoubleSpacing}}
20 \DeclareOption{single}{\renewcommand\UTSpacing{\SingleSpacing}}
21 \ProcessOptions\relax
22 \UTSpacing
23
24 % Let's default to include section numbers if the author wants them (in document)
25 \setsecnumdepth{subsubsection}
26
27 % Custom number function that handles A,B,C etc.
28 \def\UTNumToName#1{%
29 \if!\ifnum9<1#1!\fi
30 \NumToName{#1}\else#1\fi}
31
32 % Adding proper numbering for chapters, appendix in table of contents
33 \renewcommand\chapternumberline[1]{%
```

```

34 \@chapapp@head\@cftbsnum \UTNumToName{#1}\@cftasnum\afterchapternum}
35 \renewcommand\cftchaptername{\chaptername~}
36 \renewcommand{\cftappendixname}{\appendixname~}
37
38
39 % Proper table of contents
40 \renewcommand{\cftchapterfont}{}
41 \renewcommand{\cftchapterdotsep}{\cftdotsep}
42 \renewcommand{\cftchapterleader}{\normalfont\cftdotfill{\cftchapterdotsep}}
43 \renewcommand{\cftchapterpagefont}{}
44
45 % Space between the chapter lines
46 \setlength\cftparskip{2ex}
47 \setlength\cftbeforechapterskip{0em}
48 \setlength\cftbeforesectionskip{0em}
49 \renewcommand\insertchapterspace{}
50
51
52 \cftsetindents{section}{2em}{0em}
53
54 % Default to no number line (Easy to override)
55 \let\thesisnumberline\numberline
56 \renewcommand{\numberline}[1]{}
57
58
59 % Figure list
60 \let\oldlistoffigures\listoffigures
61 \def\thesislistoffigures{%
62 \clearpage
63 \SingleSpacing
64 \let\numberline\thesisnumberline
65 \oldlistoffigures
66 \renewcommand{\numberline}[1]{}
67 \UTSpacing
68 }
69 \let\listoffigures\thesislistoffigures
70
71 % Tablelist list
72 \let\oldlistoftables\listoftables
73 \def\thesislistoftables{%
74 \clearpage
75 \SingleSpacing
76 \let\numberline\thesisnumberline
77 \oldlistoftables
78 \renewcommand{\numberline}[1]{}
79 \UTSpacing
80 }
81 \let\listoftables\thesislistoftables
82
83 % Proper chapters
84 \renewcommand{\afterchapternum}{:~}
85 \renewcommand{\chapnamefont}{\bfseries\Large\centering}

87 \setlength\beforechapskip{-\baselineskip}

```

```

88 \renewcommand{\printchapternum}{\UTNumToName{\thechapter}}
89
90 % Correct numbering style
91 \numberwithin{equation}{chapter}
92 \numberwithin{figure}{chapter}
93 \numberwithin{table}{chapter}
94

```

The following will override the table of contents to supply single spacing / double spacing as required To add section numbers (non-standard), follow the command with a period, ‘.

`\tableofcontents`

```

95 \let\oldtableofcontents\tableofcontents
96 \RenewDocumentCommand \tableofcontents { s t. } {%
97 \clearpage
98 \SingleSpacing
99 \IfBooleanTF #2 {%
100 \let\numberline\thesisnumberline
101 \cftsetindents{section}{1em}{2em}
102 \oldtableofcontents*
103 \cftsetindents{section}{1em}{0em}
104 \renewcommand\numberline[1]{
105 }{%
106 \renewcommand\numberline[1]{
107 \oldtableofcontents*
108 }
109 \UTSpacing
110 }
111 %\end{macro}
112 %
113 %\begin{macro}{\UTdegree}
114 % \begin{macrocode}
115 \newcommand{\UTdegree}{Ph.D.}

```

`\UTlongdegree`

```

116 \newcommand{\UTlongdegree}{Doctor of Philosophy}

```

`\UTyear`

```

117 \newcount\UTyear
118 \UTyear=\year

```

`\UTCopyrightlegend`

```

119 \DeclareDocumentCommand{\UTCopyrightlegend}{ }{%
